

Feel the *Difference* QUALITY MAKES.

- **COMFORT:** coil spring seating units, No-Sag® back springs, adjustable tilts, and extended recliner footrests keep you comfortable in any position.
- **STYLE:** our motion furniture is designed to look great, and avoid the overstuffed appearance that is common to other manufacturers.
- **DURABILITY:** heavy-duty metal brackets, hardwood frames, and reinforced joints ensure that your furniture will last.
- **SELECTION:** choose from our extensive line of fabrics, leathers, and wood trim options.
- **COORDINATION:** matching sofa or sectional sets are available to complement your favorite recliner or tilt-back chair.

Since 1926,

Smith Brothers of Berne has been combining old-world craftsmanship with the latest technologies to build furniture that is solid, comfortable, and stylish.

Beautiful furniture, made with pride in the heart of America. We are Smith Brothers of Berne.

SMITH BROTHERS
of BERNE

**RECLINERS and
TILT-BACK CHAIRS**

Designed for
Style ...

...but engineered for *Quality.*

- Select **HARDWOOD FRAMES** provide superior stability for moving parts.

- **HEAVY DUTY TRIANGLE METAL BRACKETS** add support to high-stress areas of our Pressback Recliners.

- We designed our own **EXCLUSIVE ARM SUPPORT SYSTEM** to reduce the arm movement that is common to other manufacturers' recliners.

- All high-stress joints are **DOWELLED, GLUED AND REINFORCED** with screws and staples.

- We use **COIL SPRING SEATING UNITS**—an uncommon feature in most motion furniture.

- **NO-SAG® BACK SPRINGS** are standard in most pieces.

Are you a
RECLINER
or a
TILT-BACK

RECLINERS have the footrest built in, and come in two varieties:

Pressback Recliners have no handles, responding to your own movements as you lay back and sit up. They have decorative wood legs, and look most like a stationary chair.

Handle Recliners rely less on your body strength to operate, and also need less wall clearance. They can be fitted with an optional swivel glider base and even motorized controls.

TILT-BACKS do not have a built-in footrest, but the back can be locked in any position, and the separate ottoman can be a handy extra surface beyond a simple footrest.
